Public Safety

The second year of the Urban Deer program is underway. Just like last year, we would like to see all the harvested deer put to good use by residents. If you are interested in receiving one of the deer, please send an email to jjackson@mapleton.org to see the requirements and to be put on the donation list. There is no cost associated with receiving a deer, however we ask that only residents that are serious about putting the harvested deer to good use be put on the list. We do not want to see any meat go to waste.

Mapleton PD is excited to announce that beginning this year we will have officers in our elementary schools teaching the NOVA course. This course is like DARE and encourages students to make good choices and recognize the dangers associated with drugs. We are excited to have Detective McCoy and Officer Miller assigned to our elementary schools.

Reminder, with school starting please pay close attention to pedestrians, crossing guards, and school zones as we get used to having more vehicular and foot traffic again.

Public Works

With summer winding down, it will soon be time to turn off outside sprinkling systems. We have noticed that there are quite a few residents that are shutting their pressurized irrigation off with the city's shut off valve that is connected to the meter (City valve is between the meter and the road). This practice is prohibited by the City Code. Each property owner is required to install an irrigation box with a separate shut off valve so they can control their own system. Please use only your valve to shut off your system. If at any time you tamper with, or shut off the cities valve or meters, you will be liable for any damage you cause. The City code reads:

3.30.090: SHUT OFF VALVE:

Persons connecting to the pressurized irrigation system shall be required to provide and install a valve independent of the city's shut off valve with which they may control the pressurized irrigation service to their premises. At no time will a person be allowed to tamper with or operate the city's shut off valve unless acting under the direction of the city public works director.

Please contact the Public Works department if you have any questions regarding the pressurized irrigation system.
